

Essential Life Skills

The internship programming of DNW includes building a firm foundation of **Essential Life Skills**. While increasing their ability to effectively **communicate and resolve conflict**, students will also gain access to resources for **mental health** and learn techniques to **cope with stress**. Organizational skills will be taught to further students' ability to **manage projects, utilize time**, and expand individual **networks**. Evidence of students' **teachability** and **humility** will be demonstrated through **empathy** that inspires action, while partnering joy with **generosity** to **finances** and resources.
